

How to Add Comments to a Portfolio Page

A very powerful feature of the Mahara portfolio system is the comment tool. This adds a social component to the portfolio that allows for:

- Feedback
- Collaboration
- Spreading of ideas and methods
- Construction of knowledge

By default, all pages allow commenting by members of the Mahara community, *if they are logged into the site*. Commenting by guests is strongly discouraged since this allows for spam to quickly clog the site.

All stakeholders should be registered with the site in order to provide a more complete and richer set of feedback opportunities.

The on-going nature of the portfolio also allows for monitoring by stakeholders including teachers and supervisors. Once certain tools, such as a lesson exemplar folder, are set up, stakeholders can easily go and review the contents at will.

Once you are logged into a site and wish to *view a page* (see *How to view a Page or Collection in Mahara*),

- Go to the page and then look at the bottom of the page.
 - You can see comments if they have been made public. In this case public means members of the Mahara Community, not un-registered on guest users.
 - If you click on “Report objectionable material”, it will send an email to the administrator (Me) .

- Click on the “Place feedback” link and then in the text box, leave your comment
 - If you want the comment to be seen only by you and the page owner, then deselect the “Make Public” box.
 - You can also attach files.
